Request to Trade

Start Message Event

Organization units: 2.1 Execute FX/Derivative Trade

Register Trade economics

Task

Enter derivative trade into a system to enable pricing. This step does not apply to "simple" trades, such as listed derivatives, standardized OTC or cash bonds.

Decisions made: Trade can be registered correctly.

BR - Duality: Trade registration is subject to 4-eyes validation.

BR - Law & Regulations:

MIFID/MIFIR, Dodd Jane Doe, , clearing house listing, Short selling directive. Comply

Organization units: 2.1 Execute FX/Derivative Trade

Verify Ability to Trade

Task

Decisions made:

Verification that the customer has a credit line in place and that suggested trade ticket fits within set limit is done.

Credit Value Adjustment desk calculates cost of credit - forward risk.

Potential Future Exposure is measured - cross-product limit is verified.

Customer onboard, set up status and agreements are verified (limits, Know your Customer).

Profitability analysis is performed (e.g. consideration of Credit Value Adjustment desk charges or other charges in relation to risk profile).

Trade details are verified.

Customer Legal Identification Number (LEI) is verified

BR - External Agreement: Relevant agreements with customer should be in place: such as ISDA, CSA. Agreements required for a limit to be input in the system.

OP Risk - Processes - Data Quality: Ability to trade can be verified based on the incorrect market data, incorrect information of existing customer position, incorrect limit information.

OP Risk - Staff - Human Error: There is a risk of wrong conclusions about trading ability due to erroneous or perfunctory verification.

Exclusive (XOR) Gateway

Organization units: 2.1 Execute FX/Derivative Trade

Execute Give-up

Task

Input the trade into systems in an executed state so that it affects the Jane Doe in regards to risk and profit and loss. The fact that it's a give-up trade is conveyed by the trader selecting the customer-clearing check box on the MarketWire interface. The customer will, at the affirmation-stage, fill out details on who is the clearing broker for the customer. BR - L

Fulfill Order

Task

Decisions made: Evaluation of the best trade execution.

Customer or Front Office places specific order for foreign exchange trade which gets executed under certain price conditions.

Customer request is met in terms of preferred trading channel, response to customer request to quote or trade takes place.

Record keeping conditions are met - capturing quotes both internal as well as external.

Front Office need to adhere to the Global FX Code, follow order execution policy and published guidelines such as Ex-ante margins

Possible trading channels/ execution types: Voice trade, order placement at marketplace, electronic execution over single or multibank portal, smart order routing, pricing and quoting.

BR - Timeline: Order should be handled before currency cut-off times.

OP Risk - Staff - Human Error: There is a risk of incorrect trade detail entry.

OP Risk - Processes - Data Quality: Market data can be incorrect.
